

# GenAI Automated **CAPTIONS & TRANSLATIONS**

For a Better Connected World

## About **Videolinq**

Established in 2020, Videolinq leads the industry with its advanced GenAI automated captions, subtitles, and transcripts available in over 40 languages. Our platform enables seamless integration with any media source, facilitating users to effortlessly add captions and distribute live streams across various social media platforms and video services. Recognized by Streaming Media Magazine for "Best Automated Captions Solutions," Videolinq offers a workspace for teams to create and distribute high-quality content and live broadcasts. Key features include real-time closed captioning, advanced stream protection, a user-friendly no-code player, and audience engagement and monetization tools. Trusted by major global entities such as Verizon, TIFF, BAFTA, and PBS stations, Videolinq empowers organizations to enhance their media accessibility and reach.

## Our **Product**

Introducing Videolinq's EDIT (Enhancing Digital Interactions with Technology), a cutting-edge automated captions and subtitling service hosted in regional data centers for strict compliance with local data protection and AI sovereignty regulations. Featuring advanced encryption and stringent access controls, the platform ensures secure processing of sensitive information. Videolinq's robust AI governance framework prioritizes transparency and accountability, facilitating regulatory audits and demonstrating responsible AI practices. Clients maintain full control over media processing and AI operations, meeting compliance effortlessly while leveraging Videolinq's secure, regionally deployed video solutions to navigate regulatory hurdles and seize new business opportunities.
